

Control V300 HMI Via App

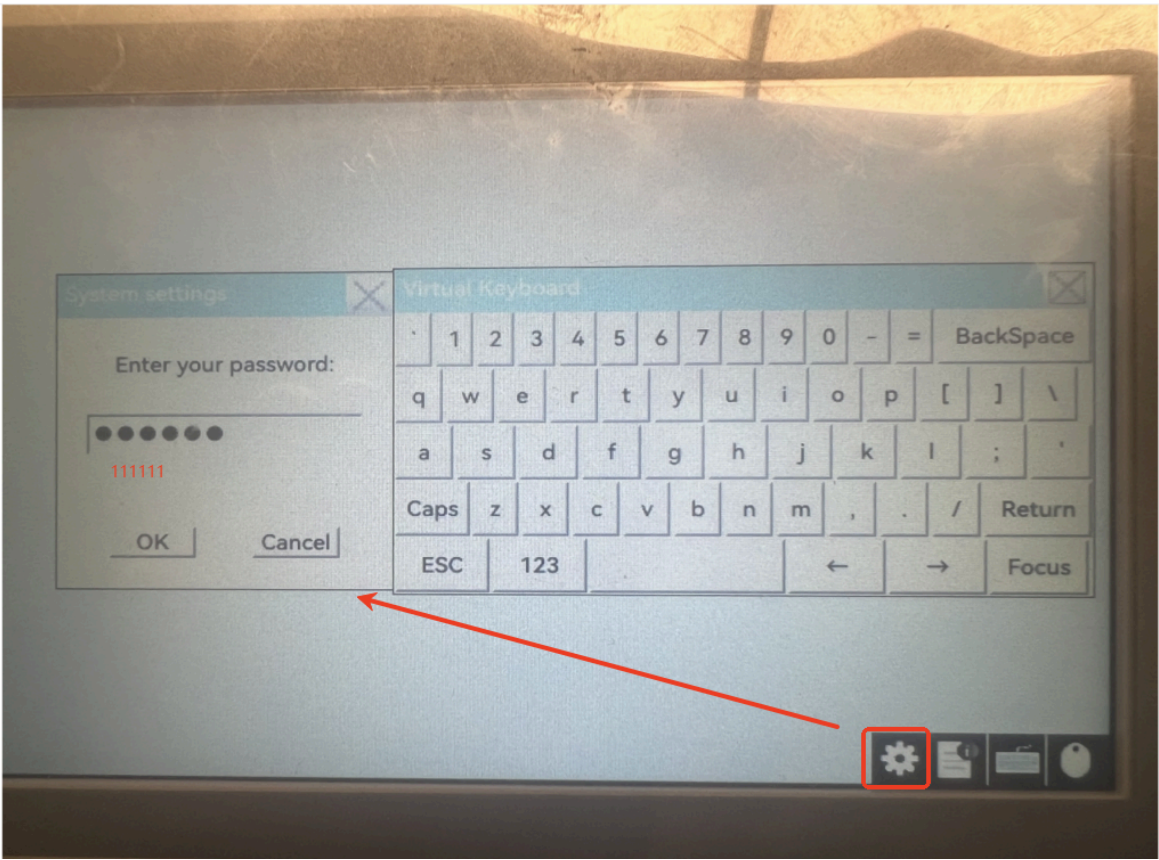

1.Find the file in root directory

"本地磁盘 (D:)"中的搜索结果 > HC_Touch_VPro > app					
🔍 📁 🗑️ ⬆️ 排序 ▾ ≡ 查看 ▾ ⋮					
名称	修改日期	类型	大小		
📁 HMI.apk	2024/10/30 14:35	APK 文件	17,795 KB		
📁 HMI64.apk	2024/10/30 11:54	APK 文件	21,177 KB		

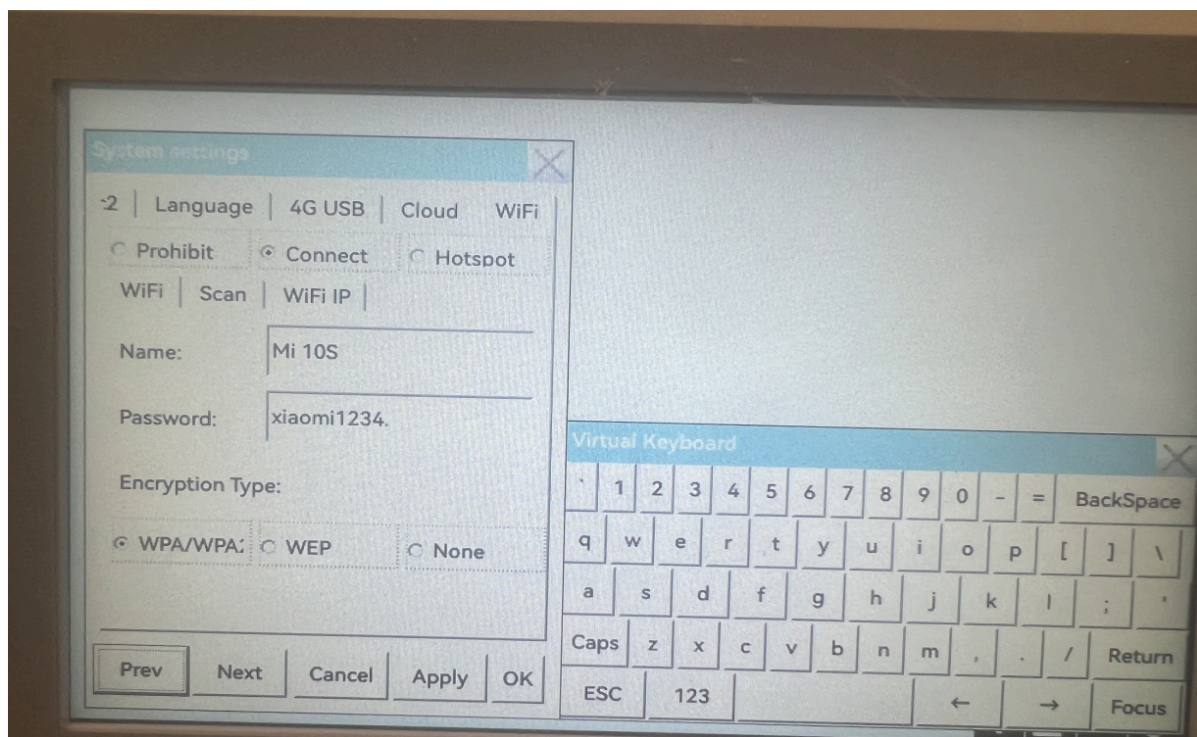

HMI.apk is the App for Android system, currently no App for apple ios.

2.Enter the system page

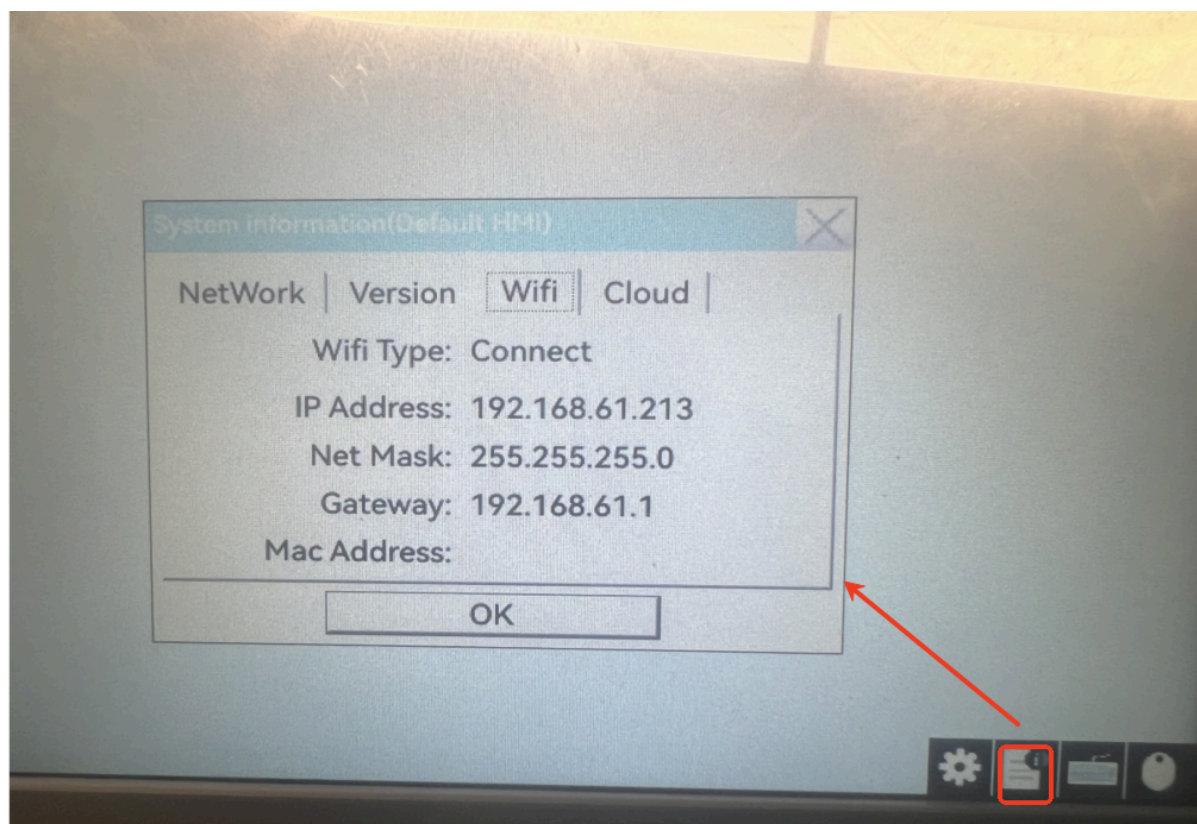

1.login password is 111111

2. Set the WIFI connection setting

3. Check the connection status

3. After install the Android App

There is no need to input the user name and password, just click the '局域网' that means LAN

Make sure that HMI and mobile phone share the same WIFI, click the '搜索' (search) then the device IP address show on the top area of the app.

Touch the item that need to be connected then click '连接' (Connect) , then wait the process finish, after that the same page as HMI is shown in this App.
